

Procurement Management Units refers to situations where the (IPA) works to manage its

supply chain effectively. Tanzania Ports Authority (TPA) must adapt their practice and promote environmental protection. Conduct interviews, collect data analyze it to be efficient make recommendations based on the results. This study focuses on ensuring effectiveness in the sales department and finally

management units. The purpose of this study is to determine how the application will affect organizational performance. The survey was used as a data collection tool. The subject of this study is the financing and procurement management units of employees of the Tanzania Ports Authority (TPA), This study used a descriptive model that was clearly explained to participants; Describes the people who participated in this study. A survey was used in which purchasing and finance personnel were asked to answer questions through a brief interview on specific topics. Primary data was collected from surveys administered to purchasing and finance personnel. A total of 46 of 58 surveys were completed satisfactorily, yielding a response rate of 79%. Written information is presented through tables, charts and graphs. This study recommends establishing close relationships with key suppliers to ensure stable supply and quality Procurement Management Units. TPA must evaluate where their largest investments are being made and the benefits that can be brought to each category. After large investments in machinery, equipment and facilities, the second largest investment should be made in stocks. This is where Tanzania Ports Authority (TPA) can save costs through increased Institute of Accountancy Arusha better space utilization, and better customer service and Procurement Management Units.
